I will scan and send you the corrected form . I also called my dealer he said everything ordered before late Oct early Nov would still be 2018 so I will leave that the same.
 Thank You

John H.

If you sold one in 2014 then you should indicate that on the letter where it currently shows zero. Also at the top of the letter where it indicates model year it shows 2018. Unless you have already reserved a 2018 glider I suspect you will be getting a 2019 model year glider and you should indicate that on the letter as well. You should check with your dealer to confirm – this will avoid us having both go through this again.

Thank you,

Steve Healy

John,
 I have one question, did JJ trucking sell a glider in 2014? To qualify for the EPA small business glider exemption the small business must have built gliders in the 2010 through 2014 timeframe and sold at least one glider in 2014. Here is an excerpt from the regulations that details these requirements:

§1037.150 Interim provisions.

(t) *Glider kits and glider vehicles.* (1) Glider vehicles conforming to the requirements in this paragraph (t)(1) are exempt from the Phase 1 emission standards of this part 1037 prior to January 1, 2021. Engines in such vehicles (including vehicles produced after January 1, 2021) remain subject to the requirements of 40 CFR part 86 applicable for

the engines' original model year, but not subject to the Phase 1 or Phase 2 standards of 40 CFR part 1036 unless they were originally manufactured in model year 2014 or later.

(i) You are eligible for this exemption if you are a small manufacturer and you sold one or more glider vehicles in 2014 under the provisions of §1037.150(c). You do not qualify if you only produced glider vehicles for your own use. You must notify us of your plans to use this exemption before you introduce exempt vehicles into U.S. commerce. In your notification, you must identify your annual U.S.-directed production volume (and sales, if different) of such vehicles for calendar years 2010 through 2014. Vehicles you produce before notifying us are not exempt under this section.

(ii) In a given calendar year, you may produce up to 300 exempt vehicles under this section, or up to the highest annual production volume you identify in paragraph (t)(1) of this section, whichever is less.

Please let me know if you have any questions.

Thank you,
